Experience

Since August 2017

Lead Web Developer at She Travels SA in Cran Gévrier, France

The main project was the development of SocialTrip, the new travel agency platform for copinesdevoyage.com and petitstripsentreamis.com using Symfony and Event Sourcing. On the background we also maintained the active platform. I was also in charge of the AWS infrastructure and the migration to SocialTrip.

Since December 2013

Lead Web Developer at 2L Multimedia/Prelinker in Metz-Tessy, France

In this role, I was responsible of developing new features, maintaining the affiliation platform and creating APIs & dashboard for affiliates and internal use. We are using HTML, Javascript & CSS to build interfaces and a few PHP frameworks on the server side (Silex, Symfony 2, ZF2 and a few handmade ones).

2013

Web Developer at Greenweez in Saint-Jorioz, France

My main mission at Greenweez was to prepare the PHP e-commerce platform in order to open in other European countries (i18n, currencies & VAT...). I also was working on new features & maintenance and improving developers workflow (eg: SCRUM, capistrano, git, redmine)

May-August 2012

Web Developer at the online job-board jobup.ch in Geneva, Switzerland

In this role I was a contractor joining a small team to help doing a major revamp of the website. This job included refactoring a lot of old HTML, Javascript & CSS.

2010-2012

Web Developer/Administrator at the European online shoe store Spartoo.com in Grenoble, France

At Spartoo.com I was in charge of helping & coordinating efforts to open the website in more European countries. This meant improving & building tools for internationalization & localization, working on new shipping & payment methods and refactoring the base code to avoid having too much duplicate code. I was also a part time administrator for the company internal network (Asterisk, Samba, printers...)

2008-2010

Web Developer in the R&D department at Symetrix (e-learning and Community of practice) in Grenoble, France

2006

Internship "introduction to development for embedded system" at VERIMAG (Research Center in Embedded Systems) awarded for outstanding student achievement by the Université Joseph Fourier of Grenoble

Education

2007-2009

Master degree in Computer Sciences (HCI) at the Université Pierre-Mendès-France of Grenoble

2004-2007

Bachelor's degree in Computer Sciences, at the Université Joseph Fourier of Grenoble
